## WHEEL RIM TAPE

**1.** *Thoroughly degrease and clean up the rim with a brake cleaner (for example) and slightly warm the surface on which you are going to install the stickers (essential operation when it is cold)*

**2.** *Apply the stickers little by little on the wheel rim, while heating the sticker slightly in order to make the glue set well on the rim.*

## CAUTION

***For your wheel rims' maintenance, avoid high-pressure washes to avoid peeling off the stickers and damaging your rim.***
